Five Parsecs from Home

Standalone combat reference

Unofficial table aid based on the supplied rulebook. Covers standard battles from deployment to victory. Use the ready-to-play force below or bring existing unit profiles. Campaign generation, post-battle recovery, and the full catalogue of enemy variants and special gear are outside this reference.

1. Set up the battle

1. **Define the objective.** Read its win and exit conditions before deployment. Resolve any scenario-specific setup, weather or visibility first.

2. **Lay out terrain.** Use a 24″, 30″ or 36″ square battlefield. Give both sides covered approaches, useful firing lanes and a terrain feature at the centre. Decide what blocks sight and which surfaces are difficult, impassable or climbable.

3. **Deploy.** Randomise your edge if the scenario leaves it open. The enemy uses the opposite edge and sets up first. In standard deployment, opposing figures start at least 18″ apart. Scenario deployment overrides this.

4. **Record profiles.** Crew need Reactions, Speed, Combat Skill, Toughness, Savvy, weapon and any save or Luck. Enemies need Speed, Combat Skill, Toughness, weapon, AI, Panic range and any special rules.

Enemy AI	Standard formation
Aggressive or Rampaging	One cluster, about 1″ between figures.
Tactical or Defensive	Divide evenly into three teams, about 8″ between teams and 1-2″ between teammates.
Cautious	Two groups 6″ apart, with 1½-2″ between group members.
Beast	Pairs spaced across three sections of the table, 2″ between partners. Place any odd figure alone.
Guardian	Place with the figure it protects.

Ready-to-play recovery. Use four baseline humans, each with Reactions 1, Speed 4″, Combat Skill +0, Toughness 3 and Savvy +0. Give two Military rifles, one Blast rifle and one Hunting rifle. Face three opponents using the **practice profile** below. This fixed loadout and opposition are a suggested setup, with the core combat rules applied as printed.

Practice opposition	Speed	Skill	Toughness	Weapon	AI	Panic
Three alien patrol figures	4″	+0	3	Colony rifle	Tactical	1-2

Acquire objective. Place an item at the centre. Reach it, spend a Combat Action to pick it up, and carry it off the battlefield to win. If the carrier becomes a casualty, roll d6. On 1 the item is destroyed, otherwise leave it where they fell and another figure can pick it up with a Combat Action. If you clear the field, you can collect any surviving item afterwards.

XLondon map scale. For your neighbourhood-sized playtest, multiply tabletop inches by **50 m** across the board. Standard move 200 m, Dash 300 m, close fire 300 m, target-priority radius 150 m and standard opposing deployment separation 900 m. Measure a move along the actual route. Check shots on a straight line and use Street View to judge obstructions.

2. Initiative, actions and movement

Seize the Initiative. Once after deployment, roll **2d6 + highest crew Savvy**. Add +1 if outnumbered. Apply −1 against Hired Muscle, −2 on Hardcore or −3 on Insanity, and any profile or gear modifiers. If you have a Feral, ignore enemy-imposed penalties. On **10+**, each crew member may make one normal move or fire before round one. These shots hit only on natural 6s.

Phase	What to do
Reaction roll	Roll a pool of one d6 per crew figure in play. Assign each figure one die. At or below its Reactions means Quick, otherwise Slow. If the pool contains exactly one 1 and you have a Feral, assign it to a Feral.
Quick	Activate eligible crew in any order.
Enemy	Activate enemies nearest your battlefield edge first, working away from you. Break equal distances from the enemy's left.
Slow	Activate remaining crew in any order.
End	Resolve morale, enemy withdrawal, scenario effects and any optional events that are due.

Activation. Move, then take a Combat Action. Either can be skipped. Firing, brawling and most objective interactions use the Combat Action. One Free Action is allowed alongside both. To take a second Free Action, give up the Combat Action.

Movement	Cost or effect
Normal	Up to Speed. Figures cannot move through other figures in the standard rules.
Dash	Speed +2″ if giving up the Combat Action. Cannot use a Dash to enter a brawl. A ranged enemy does not Dash if it can fire.
Difficult terrain	Add 1″ of movement cost per full 2″ travelled in it. Flyers ignore the added cost.
Door / window	Opening a door costs 1″. Climbing through a window or hole costs 2″.
Climbing	Pay the vertical distance. End on a surface you can stand on. A descent of 1″ or less is free.
Jump down	No movement cost. A drop over 1″ ends the activation. A drop of 3″ or more also inflicts a Damage +0 hit. Swift figures can jump straight down safely as a Free Action.
Leap	Cross a gap up to 2″ wide, counting it as movement. Swift figures can cross gaps up to 4″.
Contact	Entering contact with an enemy triggers a brawl immediately and ends the activation. K'Erin must do so if able without Dashing.

Stun. A stunned figure gets a Move **or** a Combat Action and can still take a Free Action. Clear one marker after acting. At three simultaneous markers, remove the figure as knocked out. A stunned enemy fires at the nearest visible target if possible, otherwise retreats towards better cover. It never initiates a brawl.

3. Sight, cover and shooting

Check sight from body to body. A figure of either side blocks the shot if it intervenes. A stray object permits a shot if the target is partly visible. Buildings and solid blocks stop sight through them. A low linear obstacle that partly obscures the target gives cover unless the shooter is within 1″ of it. If the whole target is visible over it, ignore the obstacle.

Area terrain such as dense woods stops sight at the near edge. A figure touching an edge can see and be seen through that side. A figure deeper inside cannot see out. Two figures in the same Area can see one another within 3″. A Field such as mud or open water can hinder movement but provides no cover or sight blocking by itself.

A target has **cover** if it is in Area terrain, touches terrain that partly hides it, or the shot passes through qualifying terrain more than 1″ from the firer. If sight or cover is borderline, allow the shot and give cover.

Choose targets. A visible enemy within 3″ forces you to target an enemy within 3″ if you fire. Otherwise choose a visible enemy in range. Swift figures direct all shots at the closest visible enemy. Enemies generally shoot the easiest legal target to hit. Crew attempting an attack that could hit an ally need a 5+ on d6 before proceeding. Swift and Soulless can attempt it automatically, while Bots cannot. Other enemies avoid endangering their own.

Target within weapon range	To hit on d6 + Combat Skill
Exposed, within 6″	3+
Exposed beyond 6″, or in cover within 6″	5+
In cover beyond 6″	6+

Resolve each shot. Apply weapon and equipment modifiers. Roll separately for each shot. Multiple shots can be split between legal targets within 3″ of the initial target, subject to Focused or Area restrictions. Resolve hits as they occur.

Aim. An unstunned shooter who stays still rerolls natural 1s on the shooting dice once. Tactical, Cautious and Defensive enemies aim from cover when they hold position. Aggressive and Rampaging enemies do not aim.

Panic fire. A crew member can fire two extra shots at half the weapon’s base range. Resolve each against the closest available target at that moment. That weapon and any identical ones carried by that character are out of ammo until the battle ends. Enemies and single-use weapons cannot panic fire.

4. Brawling, damage and saves

Brawl. Both figures roll **d6 + Combat Skill**, with +2 for a melee weapon or +1 for a pistol. K’Erin roll twice and take the better result. Lower total takes a hit, or both take one on a tie. Each natural 6 inflicts an extra hit and each natural 1 causes an extra hit on its roller. For each hit, use the highest Damage among the attacker’s carried melee weapons or pistols, or +0 without one.

• If a stunned figure is attacked in a brawl, clear its stun markers and give the attacker +1 per marker removed.

• Against two opponents, pick the first randomly and give the outnumbering side +1. If the lone figure wins, immediately brawl the second with no outnumbering bonus. At most two opponents fight.

• Separate survivors. A figure that eliminates its opponent may move 2″ without starting another brawl, except when it must fight a second opponent.

Hit resolution	Outcome
Roll d6 + weapon Damage	A natural 6 or a total at least equal to Toughness threatens a casualty. Otherwise push the target 1″ directly away, if possible, and add one Stun.
Applicable saving throw	Roll for a save when the target would become a casualty. A successful save deflects the hit. Use the best applicable save, improved by 1 if two or more apply. Piercing ignores armour saves and leaves screen saves available.
Luck	If the target would still become a casualty and has Luck, spend one Luck instead and move it d6″ in a random direction. It is otherwise unharmed. Luck refreshes after the battle.
No protection	Remove the casualty. Record it separately from someone removed only for accumulating three Stuns.

5. Solo enemies and ending the fight

AI	Movement and attack priorities
Cautious	Stay in cover. Hold and aim with a target in range and sight. Otherwise advance through or behind terrain. Engage at long range, avoid voluntarily closing within 12″ and generally avoid melee.
Aggressive	With a target in sight, advance at least half a move using cover if possible. If none is visible or an enemy is within 12″, close as fast as possible and try to brawl, avoiding opponents with higher Skill. Heavy-weapon figures hold if they have a target in sight.
Rampaging	Rush the nearest enemy and try to brawl. A Heavy-weapon figure holds and fires if it has sight.
Tactical	Advance at half speed in cover or cross open ground at full speed. Close to 12″, then look for flanks. Brawl if within one move and superior in Skill. Hold and aim if already in cover with a clear shot. Try to stay within 3″ of an ally.
Defensive	Advance into range but stay in your own half, in or behind cover. Hold and aim once in position. Brawl intruders in your terrain if Skill is equal or higher. Reinforce nearby allies whose position is entered.
Beast	Move as far as possible towards the nearest enemy while staying covered. Break cover only if a brawl is reachable within two moves. Otherwise break sight and work closer. Try to stay within 2″ of an ally and attack the same target.
Guardian	Stay within 3″ of the assigned figure if possible, matching its pace and attack target or method.

Morale. At the end of a round, roll one d6 per enemy removed by combat that round. Each roll in the force's Panic range makes one eligible enemy bail. Start with those nearest their own edge. Skip Fearless figures, including Lieutenants. Bailouts do not count as kills or trigger new checks. The crew does not roll morale and may leave by a valid exit. Once off the field, a figure cannot return.

Ending. Track **Won** (met the scenario condition) and **Held the Field** (enemy cleared or withdrew) separately. Once you win, roll at each end phase for enemy withdrawal: **2d6** for Cautious, Defensive or Tactical, **1d6** for Aggressive. Any natural 1 means withdrawal and you hold the field. Rampaging and Beast forces fight until one side is gone. When the last crew figure exits or is removed, the fight ends without holding the field if enemies remain. If the enemies are cleared first, check the scenario for objectives that can still be finished.

6. Common mission objectives

Objective	Win condition
Fight Off	Hold the field.
Move Through	Exit at least two crew from the enemy edge, or drive off all enemies with at least two crew remaining.
Deliver	Carry a package to the centre and spend a Combat Action to set it down. If the carrier falls, the package is destroyed on a d6 roll of 1, otherwise it can be picked up with a Combat Action. If you clear the field, win if the package survived.
Access	At the central console, spend a Combat Action and roll d6 + Savvy for 6+. Up to two crew may try each round. A second natural 1 locks the console and fails the mission. Engineers ignore natural 1s. Engineers and Bots get +1. Soulless can try from within 6″. You still need a successful roll if you clear the field.
Patrol	Randomly pick three large terrain features. End a crew move within 2″ of each. You can finish after clearing the field.
Eliminate	Kill a randomly selected enemy. If it would bail, it stays for the following round, can attack but cannot move. Kill it in that round or it escapes.
Secure	End two consecutive rounds with crew within 2″ of centre. Crew with an enemy within 6″ do not count. Clear the field to finish unopposed.
Protect	An unarmed VIP must spend a full round within 3″ of centre. Set them up at least 12″ from centre and the enemies 12″ away on their side. VIP profile is Reactions 1, Speed 4″, Skill +0, Toughness 3. They cannot initiate a brawl or take equipment.
Search	Mark medium and large terrain. Spend a Combat Action at or on a feature to search it. A 5+ on d6 finds the item. If every search fails, you lose. If you clear the field, roll for the remaining features together.
Acquire	Recover the central item and exit as described in the starter scenario.
Defend	Hold the field. Add one enemy. Change Cautious, Defensive or Tactical opponents to Aggressive.

Roll a standard objective (d10). Use the column for your mission type. For a quest finale, use Fight Off, add one opponent and make the opposition Fearless.

Mission type	Objective by roll
Opportunity	1-2 Move Through, 3-4 Deliver, 5-6 Access, 7-8 Patrol, 9-10 Fight Off.
Patron	1-2 Deliver, 3 Eliminate, 4-5 Move Through, 6-7 Secure, 8 Protect, 9-10 Fight Off.
Quest	1-2 Move Through, 3-4 Search, 5-6 Defend, 7-8 Acquire, 9-10 Fight Off.

7. Weapon profiles

Range is in tabletop inches. A dash in the Shots column means the weapon is used in brawling. Damage is added to the damage die. Traits follow the table.

Weapon	Range	Shots	Damage	Traits
Auto rifle	24	2	0	-
Beam pistol	10	1	+1	Pistol, Critical
Blade	Brawl	-	0	Melee
Blast pistol	8	1	+1	Pistol
Blast rifle	16	1	+1	-
Boarding saber	Brawl	-	+1	Melee, Elegant
Brutal melee weapon	Brawl	-	+1	Melee, Clumsy
Cling fire pistol	12	2	+1	Focused, Terrifying
Colony rifle	18	1	0	-
Dazzle grenade	6	1	-	Area, Stun, Single use
Duelling pistol	8	1	0	Pistol, Critical
Flak gun	8	2	+1	Focused, Critical
Frakk grenade	6	2	0	Heavy, Area, Single use
Fury rifle	24	1	+2	Heavy, Piercing
Glare sword	Brawl	-	0	Melee, Elegant, Piercing
Hand cannon	8	1	+2	Pistol
Hand flamer	12	2	+1	Focused, Area
Hand laser	12	1	0	Snap Shot, Pistol
Hand gun	12	1	0	Pistol
Hold out pistol	4	1	0	Pistol, Melee
Hunting rifle	30	1	+1	Heavy
Hyper blaster	24	3	+1	-
Infantry laser	30	1	0	Snap Shot
Machine pistol	8	2	0	Pistol, Focused
Marksman’s rifle	36	1	0	Heavy
Military rifle	24	1	0	-
Needle rifle	18	2	0	Critical
Plasma rifle	20	2	+1	Focused, Piercing
Power claw	Brawl	-	+3	Melee, Clumsy
Rattle gun	24	3	0	Heavy
Ripper sword	Brawl	-	+1	Melee
Scrap pistol	9	1	0	Pistol
Shatter axe	Brawl	-	+2	Melee
Shell gun	30	2	0	Heavy, Area
Shotgun	12	2	+1	Focused
Suppression maul	Brawl	-	+1	Melee, Impact

Weapon traits and equipment

Trait	Effect
Area	Direct all ordinary shots at the initial target. Roll one additional shot against each other figure within 2″ of it.
Clumsy	−1 in a brawl if the opponent has higher Speed.
Critical	A natural 6 on the hit roll scores two hits.
Elegant	May reroll the brawl die. Enemies reroll when behind if the reroll can improve the result.
Focused	All ordinary shots go at one target.
Heavy	−1 to hit if the firer moved this round.
Impact	If the hit stuns the target, add a second Stun marker.
Melee / Pistol	+2 / +1 to the brawl roll respectively.
Piercing	Ignore armour saves.
Single use	Remove after one use. No panic fire.
Snap Shot	+1 to hit within 6″.
Stun	Affected targets are stunned without a damage roll.
Terrifying	A target hit retreats d6″ away from the firer.

8. Protective gear and consumables

Wear at most one armour and one screen. A roll can benefit from different items, but never twice from the same item. Consumables are shared from the stash, single-use and normally a Free Action. Two in a round cost the Combat Action, and taking two copies of the same one gives no extra benefit. Bots and Soulless cannot use them.

Protection	Type	Effect
Battle dress	Armour	5+ save and +1 Reactions, capped at 4.
Combat armour	Armour	5+ save.
Flex-armour	Armour	+1 Toughness, max 6, if wearer did not move on their last activation.
Frag vest	Armour	6+ save, or 5+ against Area attacks.
Stealth gear	Armour	Enemy shots from beyond 9″ take −1 to hit.
Camo cloak	Screen	Count as in cover within 2″ of cover unless shooter is within 4″.
Deflector field	Screen	Once per battle, cancel a ranged hit before damage or save rolls.
Flak screen	Screen	Reduce Area Damage by 1, to a minimum of +0.
Screen generator	Screen	5+ save against gunfire, excluding Area and melee.

Consumable	Effect
Booster pills	Clear all Stun markers and double Speed this round.
Combat serum	+2″ Speed and +2 Reactions for the battle.
Kiranin crystals	Other figures within 4″ that have not yet acted lose this round’s activation. They defend normally in brawls.
Rage out	+2″ Speed and +1 to brawls this round and next. K’Erin retain both for the battle.
Still	+1 to hit but no Move this round or next.
Stim-pack	When about to become a casualty, stay in play with one Stun. This use takes no action.
